Hello Sydney,

Thank you so much for getting back to us... I am so delighted that you see the benefit in the issue. As a conservative Environmental Scientist, it's about time we can challenge the left on these important environmental issues they refuse to address for political reasons. As an ally, I know that Mr. Pruitt will benefit from our future discussion. I will ensure I will reach back to you in a few weeks.

Just a quick fun fact: Last week on Earth Day was the so called "March for Science" protest against the Trump Administration. Oddly enough Earth Day was founded by Sen. Gaylord Nelson. This is his thoughts on the hypocrisy of the left. *"The bigger the population gets, the more serious the problems become.... We have to address the population issue. The United Nations, with the U.S. supporting it, took the position in Cairo in 1994 that every country was responsible for stabilizing its own population. It can be done. But in this country, it's phony to say "I'm for the environment but not for limiting immigration."*

Good morning Paul,

Apologies for the delay! Touched base with the scheduling team. We have quite a bit of travel coming up after we just got done doing quite a bit of travel (I'm new to DC but it seems like summer time is the time to be gone). Would you mind looping back to me in a few weeks once we sort though when we are going to be out of town? Kind of in a holding pattern waiting for several trips to come together.

Thank you!

Great,

Again, I am sure Mr. Pruitt, will find this meeting to be beneficial. As a Environmental Scientist with a Graduate degree from Johns Hopkins, not only does the connection of population growth, driven by immigration found as a valid environmental issue. But with Presidents Trump's focused on restricting our dysfunctional immigration system, I foresee Mr. Pruitt's effort to address these connection will be very beneficial to President Trump.

Paul Clark

Hi Paul,

Thank you for reaching out! Let me touch base with the rest of the scheduling team and get back with you ASAP.

Thanks!

Subject: Request meeting with Mr. Pruitt: Regarding the environmental concerns of population growth driven by mass immigration.

Greetings Ms. Sidney,

My name is Paul Clark and I am the President of The Chesapeake Bay Population Stability Society (CBPSS). Our mission is to goal is to stabilize the population of the Chesapeake Bay watershed to ensure future environmental sustainability. Our mission includes generating greater awareness of the impacts of growth on the Bay which can be considered the Bay's leading environmental challenge. On behalf of the CBPSS, I would like to schedule a meeting with Mr. Pruitt regarding the environmental

concerns of population growth driven by mass immigration. We believe that not only will this meeting be beneficial in helping efforts to reduce immigration, as is favored by President Trump, but can also provide suggestions that implement existing environmental laws and policies. We have confidence that the resources we provide will aid Mr. Pruitt in further reducing the impacts of population growth, a considerable environmental challenge.

Please let us know when you are able to schedule a time/day/place and I will ensure my availability. For more information please view us at <http://cbpss.weebly.com> and/or www.PandorasGreenBox.com

Thank you for your time.,

Paul Clark
