September 15, 1967

When we were discussing the above on the phone, you raised the question of eight or nine weeks delivery on A-56, .008". In sheets 50 x 50 with a tolerance of .0015, we ship in three to four weeks and much faster if needed as an emergency shipment by Caterpillar. We have had this delivery time stated on other materials by Victor to end users which is most disturbing. This should be straightened out immediately.

Very truly yours,

Unsigned

George D'Olier
Chief Engineer, Gasket Materials
