ASBESTOS STANDARD

See attached memo from Macconi, CD&P.

Re the listed points, in order:

1. Review completed and deficiencies/weaknesses and recommendations given to Ducote/Shaver. Revised procedure not issued.

   Discussions with mechanical superintendents to have been handled by Ducote - he may have done. Medical requirements are being met.

2. Catalog not contemplated, insofar as I know. A simple list of the kinds of materials known to contain asbestos should suffice.

   NOTE: Macconi's statement re unbound asbestos is too narrow.

3. Decision made: we're covered.

4. N/A.

5. To my knowledge, no list of the specific individuals involved has been prepared.

6. We comply.

7. Ducote handling this--you are aware of earlier concerns re insufficient monitoring. I am still not sure that contractor's work is adequately covered.

8. Line responsibility. Freeland available for independent audit if desired.

9. (a) This point needs emphasis. Check EDS.
   (b) Standard practice--everybody.
   (c) Standard practice.
   (d) Standard practice.

Freeland and I will be available to discuss further at your convenience.
