INTER-OFFICE CORRESPONDENCE

TO: SEE DISTRIBUTION

FORT WORTH, TEXAS

FROM: Tom Wills

DATE: Nov. 10, 1981

SUBJECT: Corpus Christi Safety Audit

Environmental Services is currently developing an Environmental Audit Program to be implemented in 1982. We are being assisted in this development by ERT (Environmental Research & Technology), an environmental consultant with an office in Houston. In conjunction with this work Ms. Sara Bass, an ERT Engineer will accompany me during the Corpus Christi Safety Audit, November 17-19, 1981. Ms. Bass will function as an observer only, and no ERT report will be prepared from this visit. This involvement will greatly assist in the development of the Environmental Audit Program.

RETURN TO

SUBJECT: Loss Control and Safety Review--Corpus Christi
November 17, 18 and 19

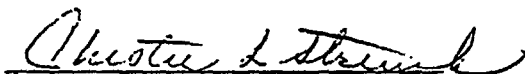

SAFETY

STANDARD

Included in our discussion this year is a review of the experience level of all operating and pumping personnel. Would you please have Ken Cornelison prepare for us the Company, Department and Unit seniority for each permanently assigned hourly employee. If available, it would be helpful to know how long each operator, pumper, helpers and/or trainees have been in their position.

In reference to line supervisors or foremen, a brief on their Company experience and length of time as a supervisor or foreman is desired. I will be particularly interested in knowing the involvement each supervisor and foreman has in the training of his personnel, as well as your appraisal of each person's effectiveness in this activity.

I am looking forward to seeing you during the survey.
