Re: OSHA INVESTIGATION RESULTS

OSHA Compliance Officer, Mark Wilson, called today to inform me he had the results back on the analysis of the insulation material we were stripping on the day of his investigation. It was 50% chrysotile which is an asbestos fiber.

He also asked if we had any further questions to which I responded no. I told him we had our respirator program down in writing now and ready to mail to the Area Director as soon as we received the citation.
