Description and Reasons Required

Funds of \$6,360

are requested to complete the annual rebuilding of the large, oil fired, kiln firebox.

Present Situation

The kiln firebox is normally rebuilt late each year, which is normally a period of low sales activity. Due to the high heat, normal expansion and contraction, the fire brick must be replaced each year. The condition of the firebox has deteriorated to the point that its repair can no longer be postponed.

Justification

The Chicago Plant is budgeted to make 7.8 M pounds of bulk litharge for 1980 to support the manufacture of lead stabilizers at the Chicago Plant. Without the kiln, the plant would have to buy litharge. The annual premium would amount to between k\$175 and k\$230.

Commercial Factors

This order supports a plant budget for lead stabilizers as follows:

<u>Sales</u>	<u>1980 Budget</u>	<u>9 Months 1979</u>		
	<u>Pounds</u>	<u>Pounds</u>	<u>Dollars</u>	<u>P.O.S.</u>
	7.8 M	6.5 M	k\$405	M\$1.2 (27.1%)

Details of Proposal

Remove and rebuild the kiln firebox. Realign kiln burners.

Contingent Future Commitments

This proposal will not require additional funds to complete.
