Attention: Mr. Dave Kliever

Gentlemen:

Reference is made to your request for our latest catalog on gas and gas-oil burners including parts lists.

Enclosed we send our bulletin 410 including this information.

You also request an installation manual on a Coppus Fanmix type DG, size 21 burner serial 42227. The member of our Engineering Department responsible for preparing these installation manuals is on vacation this week and since this is a relatively old burner which has been superseded in design in some respects, we will ask that you hold off a week until his return so that we are certain that we are sending you the correct installation manual.

In the meantime, for any assistance we can give you, as we feel you have acquired this burner, that is assistance in checking the type of installation you intend making of this burner, if you will explain to us the proposed application we will be pleased to comment.

Cordially yours,

COPPUS ENGINEERING CORPORATION

W. T. Rogers
