

**MODERNIZE**  
Your  
Molding Process

Ready to Use

**Refined  
Molding Wax**

*Formula Suggested and Approved  
by International Association  
of Electrotypers*

Abolish the costly method  
of melting together hard  
waxes, gums and oils.

Eliminate straining.

Save time, increase opera-  
tor's production at least  
15 per cent.

Perfect molds possible  
every time.

Longer life — less steam  
pressure — greater  
working latitude.

500 lb. lots, per pound.....\$ .25  
100 lb. lots, per pound..... .23  
Less quantities, per pound..... .30

READY-TO-USE REFINED  
MOLDING WAX is prepared in  
large quantities, from a standard  
formula containing Pure Hard  
Green Ozokerite, Refined Yellow  
Beeswax, Candelilla Wax, and Gum  
Thus.

It is heated and mixed in a steam  
kettle just as you would produce it  
in your own foundry.

After straining it is molded in con-  
venient five-pound cakes, ready to be melted  
in your own steam kettle without the addi-  
tion of other ingredients.

READY-TO-USE REFINED MOLDING  
WAX is made to a consistent formula.  
Every batch is tested before leaving our  
factory. Every lot you receive will be ex-  
actly like the last.

Once you have determined the value of  
this excellent wax in your process you will  
have set a formula that can be depended  
upon to give identical results month after  
month, and year after year with unvarying  
regularity.

MANUFACTURED BY

**G. C. Dom Supply Co.**  
CINCINNATI, OHIO

*Headquarters for Electrotypers'  
Supplies*

Sold at a price  
little above the ac-  
tual cost of Aus-  
trian Ozokerite
