Cincinnati, Ohio.

Re: [REDACTED]
Topsfield, Mass.

Dear Sir:

Thank you for your report of June 12, 1931 on the above case. I am very glad that your investigations proved that this was not a case of lead poisoning as frankly there was considerable agitation over this man's illness which was attributed to lead poisoning.

If we have any further reports on this or any other suspicious case, we will immediately contact with Mr. Ronan in New York so that your investigation may be made as promptly as possible. I regret that this information did not come to us earlier but reported the case to the New York Office of the Ethyl Gasoline Corp. immediately I received the information.

Yours very truly,

W. V. C. Bulkeley
Asst. Dist. Sales Mgr.
