Guest,

At C_TEC , we promote the role of technology in our economy and advocate for rational policy solutions that drive economic growth, spur innovation, and create jobs. We also work to showcase the benefits of emerging technologies and how they are positively impacting different sectors.

Blockchain is an excellent example of the potential for a technology to change the way we work, communicate and live. This coming Wednesday, August 1st, C_TEC will host a [half day event](#) in Washington, DC, to explore the power of blockchain and debate policy ramifications by convening leading innovators, policy leaders, thinkers, and investors. Experts from Blockchain.com, Walmart, Accenture, ConsenSys, Guardtime and more will explore some of the use cases for the technology in agriculture, health, government, and financial services. We'll also provide attendees with an informative 101-session to lead our discussion. I'd be delighted to have you join me as my guest. [Register for Get Smart on Blockchain](#) being held at the US Chamber of Commerce, 1615 H Street NW, Washington, D.C. on August 1st beginning at 12:30pm.

Whether you view yourself as an expert or an amateur, can discuss mining in great detail, or are wondering the differences between bitcoin and ether, you'll be sure to learn valuable information at [Get Smart on Blockchain](#) next week. I hope to see you there.

Best,

Tim Day
Senior Vice President
U.S. Chamber Technology Engagement Center
