director?

A I would have to guess 200, but that could be from 100 up to 500.

Q Could you explain to me based on your definition of what a print is why there would be a reduction around the 1970 period from over 4,000 prints released annually by the FMSI down to a few hundred at the most when you were secretary?

A She used to take the big prints that come in from some brake lining manufacturer and duplicate them, send them out and get them copied for two bucks apiece -- I got a Xerox machine -- reduced them all to 8 1/2 by 11 and just hand them out and probably couldn't be bothered counting them. What I am saying, a print when she was there it was a major operation, the introduction of the Xerox machine which came out around that time. I just didn't keep track of the prints, there are 400 prints or -- or 4,000.

Q Yes, actually this is 4,224 over 11 months?

A Well, I said 200 a month and there is 12 months -- did I say 200 a month -- what did I say, 200 a year, 200 a year prints. Those are the one print, that's not one copy here, one copy there, one copy there. She is saying every damn copy she sent out of the place. So if I made up a
