Ethyl Gasoline Corporation,
320 Yonkers Avenue,
Yonkers, N. Y.

Gentlemen:

Attention: Medical Department

Will you kindly advise me as to the effects that Ethyl Gasoline would have if, thru an accident, the body of an individual should become drenched with gasoline and portions of it entered the eyes? Would any injurious effect to either the body or the eyes be delayed for a period of several months? Would Ethyl Gasoline in the eyes be any more injurious than gasoline with no Ethyl fluid in it?

I would appreciate your advice reference these questions at your earliest opportunity.

Very truly yours,

LOUISIANA OIL REFINING CORPORATION,
