

FROMMELT SAFETY SCREENS AND BLANKETS

FROMMELT PORTO-SCREENS

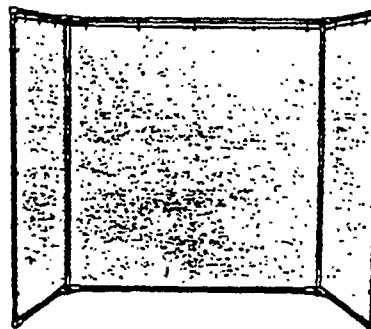

Practically any operation that produces sparks can be dangerous. Some more than others. But it only takes one spark in the right place to cause a lot of trouble.

Sparks from welding operations are a very frequent cause of fires. Even when recognized as a problem it may not be practicable to move all flammables a safe distance away from the welding operation.

The solution to the problem then is to isolate the spark-producing work. . .to erect a protective barrier around the work to contain the sparks. PORTO-SCREENS ARE THE ANSWER!

The fire resistant covering fabric is medium weight Duck, UL, FM and California Fire Marshal approved. Resistant to fire, water and mildew. Safety yellow color.

"Build it yourself to fit your own needs." Here's a safety screen in kit form that provides all the materials you need to construct a protective enclosure and all the flexibility to custom-fit it to your own particular needs. Included in the kit is a fire-resistant covering fabric, slip-on hinges, slip-on tees and hooks. You supply the 1/2" pipe for the framing. Practically any size available. Offers complete protection and foldability for storing.
