Subject CHOCOLATE BAYOU TECHNICAL DATA SHEETS

Below are comments on the STORAGE AND HANDLING section of the subject sheets.

1. On all of the sheets the statement "For detailed information regarding this product please refer to the Conoco Chemicals Company Material Safety Data Sheet" must be added in bold face type, at the end of the Storage and Handling section. A Tech Data Sheet for Ether Sulfates is attached as an example.
2. The Benzene sheet should be amended as indicated on the sheet.
3. For all of the gaseous products the following statement should replace the one which is marked out in red on the draft sheet: (Product) is a simple asphyxiant and normal and good operating procedures should ensure personnel safety. In any event, care should be taken to avoid exposure to vapors or contact with liquified product.
4. For all of the liquid hydrocarbon products, the following statement should replace the portions marked out in red: Normal good operating procedures and housekeeping should ensure personnel safety. In any event, care should be taken to avoid contact with the eyes, prolonged or repeated contact with the skin, and exposure to vapors.

Please let me know if you have any questions on the above.
