Nominations and Elections

The above nominations are published in accordance with the Constitution, By-Laws, and Rules of The American Ceramic Society. Reference may be made to the rules for this procedure in the BULLETIN for Feb., 1952, p. 62.

Ballots for the election of officers of The Society and for the election of trustees and officers of The Divisions will be mailed to each Member in good standing the first day of December. They must be returned to be received in The Society offices before the first day of January.

Article B VII 2 provides: "The names of the Trustees' nominees, together with this By-Law, shall be published in the AMERICAN CERAMIC SOCIETY BULLETIN on or before the fifteenth day of October. Any twenty-five voting members in good standing may, by signed petition, nominate any additional candidate for one or more of the offices, provided: the signed petition, together with assurance of assent of the candidate or candidates, reaches the General Secretary of THE SOCIETY on or before the fifteenth day of November following the publication of the Trustees' nominees. The petition may be in multiple copies and the General Secretary shall, if such be the case, certify that at least twenty-five signers are eligible to vote."

American Ceramic Society

Membership Roster

This Roster is published only for the convenience of members of The American Ceramic Society. Its use as a mailing list is in violation of federal copyright.

Listings are in alphabetical order. New members received too late to be included are listed in the Addenda on page S27a. A separate Roster for the National Institute of Ceramic Engineers, showing grades of membership, is on page S92 of this issue.

These listings give the member's preferred mailing address. Where this is not his business address his company connection is shown in parentheses. Divisions and other Society affiliations are indicated in parentheses following each name, in accordance with the code given at the right. The absence of any such designation indicates that the member is from outside the United States or a student member, neither of whom has Division affiliation.

B—Basic Science Division
C—Ceramic-Metal Systems Division

HIGH DENSITY/HIGH ALUMINA

GRINDING CYLINDERS

Increase production...cut costs!
Reduce pebble mill grinding time.

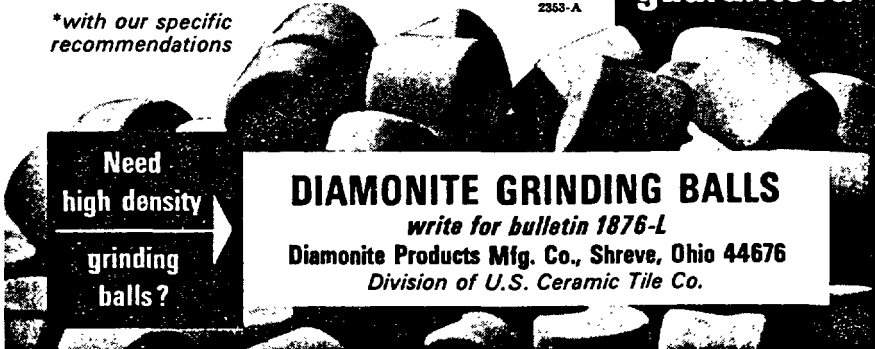

- Less expensive than other high density media.
- Cost less to use than flint pebbles.
- Unmatched wear resistance.
- Extremely high density.
- Maximum grinding contact.

Specify Diamondite Grinding Cylinders
for grinding or dispersion of enamels, paints, ceramic materials, glazes, chemicals, pigments, pharmaceuticals, raw materials.
