August 9, 1977

Paul L. Wright, Ph.D.
Manager, Toxicology
Monsanto Company
800 North Lindberg Boulevard
St. Louis, Missouri 63166

Dear Dr. Wright:

Enclosed is a draft copy of our first interim report with the progress to date on the study we are conducting on the effects of a PCB mixture on the reproduction of the rhesus monkey (Macaca mulatta).

This report covers the time frame up to the end of June 1977, which is the first three months of study plus the pre-drug testing results. In some areas information is presented which became available in July, for example, test compound receipt dates. Such information will be repeated in the next report along with any new data.

Because this is our first report for the Monsanto Company, I am sending a draft to ensure that the format and degree of detail are satisfactory. Once I hear from you, we can forward as many copies of the report as you request. Please do not hesitate to call if you have any questions.

Sincerely,

Dave

David P. Martin, V.M.D.
