Robert A. Kehoe, M. D., Director
Kettering Laboratory
College of Medicine
University of Cincinnati
Cincinnati 19, Ohio

Dear Bob:

I am wondering if the papers presented in your Post-graduate Course for Physicians on The Lead Problem in Industry, which you held at the Kettering Laboratory, College of Medicine, last November have been published or are available.

I would like very much to have copies of the various papers if possible and would appreciate hearing from you as to whether these can be obtained.

Kindest personal regards.

Yours sincerely,

L. E. Hamlin, M. D.
Medical Director

Dear Hamlin:

Unfortunately the papers given in our post graduate course were not made available in typed or mimeographed form. This was the case for two reasons: (1) it was the first time around and I thought it just as well to have a trial run before printing the material; (2) we

as a regular academic course which is to be repeated as required,

If you want anything in book or report or repeat form, I'll be glad to send you the lot. Unfortunately again, because I've been so pressed for time, a great mass of material ^{and discussion} unpublished; this was presented in part, such as, for example, the data ^{and discussion} on tetraethyl lead poisoning as a general industrial oil hygiene problem, and the observations made on the metabolism of lead that prove "deleading" by the most commonly suggested means, to be an impossibility.

We expect to give the course either this year or next.

Do you hear

Take part

if you can, I'd like to have your agreement in all respects, that will detract from the interest in the matter of the value to students the subjects.

Sincerely
