Subject: Email from Technical Committee to Principal Investigators

Dear Patsy:

Shan Tsai forwarded to me your email to the PIs (below). Although my name appeared on the receivers' list, I never received the email directly from you. I could not tell from your email what address you used. To ensure that I get your email in the future, please use the following addresses:

ottowong@aol.com
ottowong@shmu.edu.cn

Regards,

Otto

Subject: Shanghai Health Study - Communication from the Benzene Health Research Consortium

Dear Dr. Fu, Dr. Irons, Dr. Wong;

The Benzene Health Research Consortium (BHRC) wishes to reaffirm that the Shanghai Health Study is a completely independent study under the direction of the principal investigators.

We reaffirm that a grant to the University of Colorado and contracts with Fudan University and Applied Health Sciences have been awarded to the principal investigators to fund these studies.

SHELL-MCCLURG-053651

Dr. Richard Irons, the principal investigator from the University of Colorado, is responsible for the clinical, laboratory, and exposure assessment portions of the study. He has contracted with EMBSI to do the exposure assessment. Activities in support of the exposure assessment, such as an exposure assessment workshop, is the responsibility of Dr. Irons.

The consortium appreciates the excellent work that has been done and the work that is continuing. We look forward to your updates at the annual meeting in November.

Regards,
Patsy Clegg Jennifer Galvin
