SEP - 6 1978

August 31, 1978

Mr. Daniel Janetka
International Harvester Corp.
401 North Michigan Avenue
Chicago, Ill. 60611

Dear Mr. Jenetka:

Confirming our recent conversation, Glastic grade UTR (NEMA Standard GPO-3) is made of roughly equal percentages of polyester resin, hydrated alumina filler, and fiberglass mat reinforcement. This grade is sold in cured rigid sheet form which is inherently more inert than a liquid or uncured putty like material would be. It contains no asbestos.

Very truly yours,

THE GLASTIC COMPANY
