Gauke,

Welcome to the wonderful world of aromatics. What timing - with the Shanghai Epi study and anticipation of benzene being on the VCCEP list.

Patsy

Jeff,

As you are aware, Tony Mallett will be leaving Shell to act as a private consultant. He will be staying until the end of November to help in the transition of his responsibilities to Bob Priston and Gauke Veenstra.

Three things are required:

- Tony's PSA role needs to go to somebody.
- Secondly, I have attached a transition plan which we will adopt to work Tony out and phase into Gauke and Bob. Part of this requires us to present the 2001 PBU support to PBUs and I will

have to tell HODER and probably LO that there will be some reduction to accommodate take of Tony's work.

- Thirdly, the following allocations for PBU support in our London group is:

Gauke Veenstra: HODER
SM/EB
Aromatics

David Owen: Hydrocarbon and Chemical solvents

Bob Priston: EO/Glycols
PO/urethanes
LOlefins
Oil Products (CONCAWE)

Can you cascade this through the PS organisation?
Call me if you need more details.

* Ideally, Bob's PS role should also be transferred as he will be very loaded (certainly beyond CLP projections) with the addition of Tony's work.

Many thanks,
David

David Owen, CHSE-DO
