

1 of asbestosis is a fatal disease and well documented
2 in the medical and scientific literature.

3 Lung cancer, started to talk about lung
4 cancer in 1935, and it was established in the medical
5 and scientific literature by 1955.

6 This is well before Mr. Grewe's exposed,
7 before he is a brake mechanic. That is why we were
8 showing you, and that is why we wanted you to
9 understand they don't have to know the particular
10 harm.

11 They don't have to know mesothelioma, but
12 even if you think they should and they don't by any
13 means, the testimony in this case is that it was
14 well-established in 1960, but believe me, you don't
15 have to prove that. That is not what needs to be
16 proved.

17 Foreseeable in the sense that it has to
18 fall in the general field of danger, an anticipated
19 field of danger.

20 Mesothelioma is a form of injury to the
21 respiratory tract, the lungs, the pleura and so is
