DOC#: JMA521

DOCUMENT DESCRIPTION: Memo RE Westinghouse Asbestos-Cement Sheet, Part 2 of 2

3459A&B

Johns-Manville

Internal Correspondence

To: J. V. Magee - 5S3

Date: May 18, 1976

From: E. M. Fenner - 4N3

Copies:

Subject: WESTINGHOUSE CORPORATION

I have reviewed the letter from Westinghouse to Ed Fisher that you forwarded to me recently asking for my comments.

I would tell Westinghouse, "There is presently no successful economic substitute for asbestos in asbestos-cement products, and in many applications there is no product that can substitute for an asbestos-cement sheet. There are no active research and development programs in Johns-Manville which might yield asbestos-free substitutes in the near future."

I enclose Material Safety Data Sheets for EBONY and CHEMSTONE as requested.

E. M. Fenner

JM Memo

From: R. Hoffman

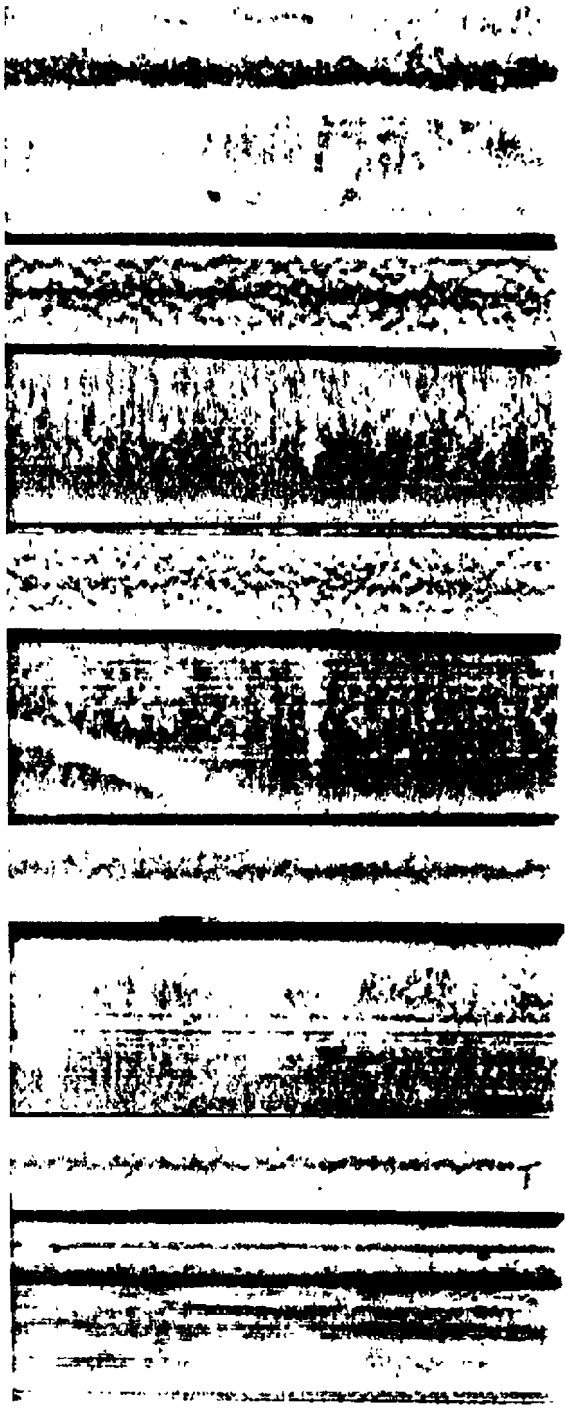

To: Lorna Schmiegel Box Location: Waterville

Date: 5/4/76

Subject: WESTINGHOUSE ELECTRIC ATT'D LETTER.

Our Sealing Components sales rep in Pittsburgh, Mr. Ed Fisher, has been experiencing some resistance to asbestos containing products. The attached letter is one such incident. Since these aren't Ed's he couldn't advise regarding them. Please reply to Westinghouse on those items which you handle.

Also Ed would appreciate knowing what course of actions you have taken as it might be of assistance to him on his products. He can be reached by phone at 412-264-1211.
