

The Environmental Protection Agency has announced that it will prohibit the U.S. production and importation of asbestos friction products. The rule will force vehicle makers to use non-asbestos materials in brakes starting with 1994 model vehicles and will prohibit replacement brakes from being made with asbestos by 1996.

Abex is ready to meet the demand now! We've been developing and manufacturing asbestos-free materials for more than a decade. Through research, dedication and innovation, Abex is committed to serving the needs of the braking industry.

Abex, the first asbestos-free supplier to ***Stop Everything!***™

Abex®
Friction Products
