SUBJECT: Proposed exposure of test program for
acetylene-derived vinyl chloride monomer

Gentlemen:

In response to your request made at the sponsors' conference last April 20, I have determined that:

(1) Industrial Bio-Test Laboratories do have chambers available to add either one or two additional levels of acetylene-derived monomer to the planned exposure series.

(2) Each such additional test level, conducted in a manner strictly comparable to those planned for the full industry study, would be expected to cost \$27,500 to \$28,000.

I trust this information will be adequate to serve your present purposes.

Sincerely,

Kenneth D. Johnson
Assistant Technical Director
Air Quality & Occupational
Health
