Mr. John Van  
Armstrong Chemcon, Inc.  
10330 Roosevelt Road  
Westchester, Ill. 60158

Dear John:

We will soon be manufacturing asbestos free joint compound in our one-gallon pail size only at Chicago and Acme and this will require a modification to our current pail design.

By copy of this letter I will ask our Akron, New York plant to mail you one of the new design pails which will show you the location of the words "asbestos free". Also, please be certain that the asbestos caution label is deleted when new printing dies are made up.

I will appreciate receiving an approximate inventory of manufactured pails and/or predecorated plate on hand so we will have some idea how long it will take to run the old design out.

Thank you.

Yours very truly,

Edward L. Aasen  
Purchasing Manager  
Gypsum Division
