INTEROFFICE / LAKE CHARLES

TO Shipping Personnel DATE May 31, 1988
FROM Jim Lafleur *je* SUBJECT Safety Kleen TC
Valves

As indicated by the attached letter to Dr. Looney from Jon Shepherd, we will not allow anyone to use the cleaning solutions for tank car angle valves, if they are not approved for work in the derivatives area. The current policy states that once you are disapproved you must have two consecutive blood samples OK'ed before you can be allowed to work in the derivatives area or with solvents in general.
