We now add 7 more pounds to each bag. Why? Because the new 32-lb. size makes 5 full gallons of wet mix instead of under 4. (So much handier for the standard 5-gallon drum!) And since each bag makes a bigger batch, this reduces total mixing time—saves costly man-hours on every job. The new size also means fewer bags to open, fewer "empties" to clean up. Here is another example of how we find new ways to help you make more money. **UNITED STATES GYPSUM**

THE GREATEST NAME IN BUILDING
