**Subject:** Re: EPA Hurricane Maria Update for September 22, 2017

Hello there , I strongly support epa to conserve environment world wide and no way I am involved with environment pollution , also i am designing and portable lab for monitoring environment pollution industrial potion using satellite remote sensing specially bio chemical oxygen demand and chemical oxygen demand reduction contamination from textile pollution tannery , cement glass ceramic , and cosmetics industries in Bangladesh specially nearby Dhaka city and we will issue some sort of warning against such industries in here , we are waiting for any response from epa

Thanks.

**EPA Hurricane Maria Update for September 22, 2017**

WASHINGTON (September 22, 2017) – U.S. Environmental Protection Agency (EPA) continues to coordinate closely with federal, commonwealth, territory and local partners as the Agency responds to the impact of Hurricane Maria. EPA is supporting the Federal Emergency Management Agency (FEMA) through its assistance to the governments of Puerto Rico and the U.S. Virgin Islands. EPA is focused on environmental impacts and potential threats to people’s health caused by Hurricane Maria, as well as the safety of those in the affected areas.

About 80 personnel are currently involved in hurricane efforts. The following EPA teams of On Scene Coordinators, scientists, technical assistance professionals and other first responders are deploying to Puerto Rico and the U.S. Virgin Islands this weekend, once conditions are safe to travel, to assess conditions in the aftermath of Hurricane Maria:

- Water Sampling
- Hazardous Materials Assessment
- Drinking Water and Wastewater Facilities Assessment
- Regulated Facility Assessment

EPA has important resources available online in English and Spanish about floodwaters, hazardous debris, household hazardous waste, and other hurricane impacts. EPA will continue to provide regular updates about EPA’s response to Hurricane Maria. For information and updates, visit: [www.epa.gov/hurricane-maria](http://www.epa.gov/hurricane-maria).
