Mr. Walter E. Schalk

Here's a copy of the proposed reply to the San Francisco Chronicle about possible contamination of wildlife from polychlorinated biphenyls. This answer was worked out with Jack Garrett of Elmer Wheeler's group. It was reviewed with Bob Keller and also with Paul Benignus, in Olson's absence.

I understand you now want to review the answer with Ernie Robson. I am also delivering a copy to Howard Bergen for his information.

The editor called Monday and it has taken this long to formulate an answer. I should call him back as soon as possible. Would you and Howard please let me know your comments; if you like, I will be glad to come over.

Tom C. Ford
