Mr. Kalinowitsch questioned whether there is a standard policy on asbestos throughout the company. Mr. Schreiber explained that each case must be treated on its own merits because in some cases to attempt to remove asbestos is more dangerous than sealing it. However, asbestos is being either treated with a sealant, encapsulated, or removed when discovered. *

The meeting was adjourned at 11:20 a.m. to be reconvened at 10:00 a.m., September 18, 1985 at Whippany in room 3C-210.
