DOCUMENT DESCRIPTION: Letter from OWILL to Saranac Laboratory RE Kaylo Division & Research

OWENS-ILLINOIS GLASS COMPANY

GENERAL OFFICES · TOLEDO 1, OHIO

December 12, 1950

. Arthur J. Vorwald, Director
e Saranac Laboratory
ranac Lake, New York

ar Art:

Some time ago we mentioned to you that our Kaylo Division wants to ther together in brochure form material on the health aspects of Kaylo st, and wants to consider the possibility of publishing some of your perimental findings.

As we recall it, you mentioned during the visit that Dr. Shook and made to Saranac last July that the animal experiments were all com-eted (and no new ones need be started) and that the results of the veral years' program would be written up in final report form. Could u let us know how this project stands?

Could you also let us know how we stand on the finances? Our ac-unting department reports that they have paid two invoices this year— e in January for $1250 and one in May for $1250.

We still feel that before this work can be finally completed, it uld be desirable for one of your engineers to visit our Sayreville nt and, among other things, take some gross air samples for compo-ition analysis. Any time such a trip can be worked into your schedule nveniently, let us know.

One more point—you mentioned last July that all the asbestos work ried on through the years at Saranac was being written up and would published. Has this been done yet?

Best wishes to you and Mrs. Vorwald for a merry Christmas—with s of snow in the Adirondack hills—and a happy New Year.

Sincerely yours,

Bill
