California, what was your job?

A There was a West Coast division, and I ran it.

BY MR. McGOWAN:

Q Did that include insulation products as well as textiles?

A It included insulation, right, fiberglass insulation.

Q Did you have anything to do with the S and C units?

A Not really. They were a separate group, operated out of Toledo.

Those were sales and contracts. You took contracts and used fiberglass and other products.

Q Did the Santa Clara office have an S and C unit during the 1959 to 1964 time period?

A No. They had one in L.A., had one in Seattle and had one --

Q San Francisco?

A San Francisco, of course. I think those three were the major ones.
