Subject: RE: Scenario and movements for Saturday

Milan & Mark,

Update!

The two 8-seater vans and the luggage vehicle will not fit in the underground Kiss and Ride at the train station. The ceilings are too low, so these vehicles can not be a part of the motorcade for the first movement from the station to the Sevoia. So there will be two departure points. The two sedans will still depart and ride in the motorcade. The two vans and luggage vehicle will depart from a nearby parking lot and travel separately to the Sevoia.

After CG Rupp greets the Administrator, the group will break off. Those riding in the sedans will go with the Administrator. One of the two porters will load the Administrator's bags into his vehicle. The other porter will guide the delegation members to the vans and load the luggage vehicle. See updated scenario below...
