WILL EXPAND IN GERMANY.

**Foster Wheeler Building 12 Oil
Plants in Europe, Chairman Says.**

J. J. Brown, chairman of the Foster Wheeler Corporation, who will sail today on the Bremen, said yesterday that his organization had formed a company to acquire plant facilities in Germany.

He added that Foster Wheeler was interested in the oil refining industry in France, where it hoped to obtain a large volume of business when the French Government has granted its approval. He said Foster Wheeler was building four refineries in Russia for the Soviet and had altogether twelve refineries under construction in Europe. He intends to visit his company's offices in France, Germany, England and probably Russia.
