December 30, 1948

Dr. Robert A. Kehoe
Kettering Laboratory of Applied Physiology
College of Medicine, Eden Avenue
University of Cincinnati
Cincinnati 19, Ohio

Dear Dr. Kehoe:

Following is a record of the physical examination of twelve Aluminum Ore Company employees who are exposed to lead:

[REDACTED]
Heart Normal - Hernia none - Reflexes normal - b.p. 120/68 - Ht. 5' 8" -
Wt. 125 - Complaints none.

[REDACTED]
Heart normal - Hernia none - Reflexes normal - b.p. 110/64 - Ht. 5' 10" -
Wt. 125 - Complaints-no new complaints. Feels same now as he did last year.

[REDACTED]
Heart enlarged to left - Hernia bilateral - Reflexes normal - b.p. 160/78 -
Ht. 5' 10" - Wt. 156 - Eyes-right eye blind. Complaints-says he develops
skip in pulse whenever blood sample is drawn for lead testing. Pulse regular
at examination. Smokes one package cigarettes daily. No further complaints.

[REDACTED]
Heart normal - Hernia none - Reflexes normal - b.p. 160/90 - Wt. 213 -
Ht. 5' 6 $\frac{1}{2}$ " - Nose-polyp in both nostrils. Perforation in nasal septum. Is
going to family doctor after holidays to get a reducing diet. No further
complaints.

[REDACTED]
Heart enlarged to the left. Tones distant. Hernia none - Reflexes normal -
b.p. 140/90 - Ht. 6' 2 $\frac{1}{2}$ " - Wt. 207 - Complaints none.

[REDACTED]
Heart normal - Hernia potential right - Reflexes normal - b.p. 116/74 -
Ht. 5' 7" - Wt. 145 - Complaints-cramps in arms and legs. Wakes up in
morning with either arms or legs cramped. Movement clears up trouble in
working. If he holds one position too long muscles in arms will cramp.
