Marjorie -

At the risk of beating a "dead horse,"  
I've enclosed the attached article which  
I came across the other day.

I have no idea who Mr. Parrish is but he's  
obviously quite knowledgeable about PCBs.  
In light of your recent and well done  
article, I thought you'd find his comments  
about the 1968 Japanese incident of special  
interest.

## Manufacturing of all PCBs illegal in U.S.

Manufacture was placed out to the United States which produced about 1.2

Not enough large-scale studies of the health effects of PCBs have been performed, and studies should be cooperative, not

General Electric is under orders by the federal government to close up PCEs that were damaged over the years from its plants in the Hudson and Connecticut rivers.

Pills are still manufactured in West Germany, France, Spain, Italy and several Eastern European countries.
