

TO Distribution DATE August 21, 1987  
FROM R. J. McCorquodale SUBJECT Liver Enzyme Policy

Re: Memo of August 17th (attached):

I met with J. C. Delgado, 8/20/87, to review the questions/concerns outlined in the memo which was drafted from our 8/13/87 review meeting.

Item Response

- 1.) The 10 year definition, in all cases, will mean 10 consecutive years of assignment to a Derivatives job or a shipping job with Derivatives products responsibilities.
- 2.) Covered employees will mean all employees who have been actually assigned to a Derivatives job or a shipping job with Derivatives products responsibilities. Does NOT include potential or overtime assignment.
- 3.) Will be changed to be consistent with Derivatives assignment not VCM.
- 4.) A.) This item is open. Pursuit of the question will be made after discussing with John Fike and Chuck Bellon.  
B.) Example B is the proper interpretation. The Doctor has the option/ responsibility to make judgement decisions based on all data and input available to him. If the situation(s) described in paragraph 3 occur, he (Doctor) is being counseled to give consideration to restriction.
- 5.) A.) An outline of the baseline monitoring was reviewed by J.C. which he found completely acceptable.  
B.) This item is Open. It will be followed with question 4.(A.).
