DOCUMENT DESCRIPTION: BC Notes on Moody's Manual Entry on Celotex
1944-1957

Celotex

Moody's Manual of Investments 1944-57 lists a plant in Metuchen NJ as making "asbestos cement board products, insulating siding..."

The Metuchen plant is also noted in earlier editions of Moody's but asbestos is not explicitly mentioned. (1940: asphalt felt and tar for roofing ; 1942 : shingles, sidings, felt roofing, impregnated board and brick siding) From products described it looks like they started making asbestos cement products around 1942.
