IN-10 REV. 11-65

TOWOLDMON0055879

As most of you know FDA issued proposed rules relating to PCBs in food, animal feed and food packaging plants in the Federal Register on March 18, 1972. Monsanto has responded to the FDA proposals. You may find the attached reply of use in customer contacts. This response is not meant as a crutch for customers in industrial applications who have not yet converted Therminol FR systems. In those cases we are firmly committed to the need for speedy conversion. This response should be helpful at:

a) Paper accounts who may view MICC as the root cause of the PCB problem.
b) Carbonless paper accounts.
c) Dielectric accounts.
d) Converted Therminol FR accounts who are grumbling we did nothing to support them with government agencies.

Specifically you should deliver a copy of this response to:

1. Westinghouse locations (Purchasing/Technical).
2. Transformer Accounts (Contacts as per Paul's SIB #85).
3. NCR - Tom Bush (D. H. Lewis).
4. Nashua - Gene Toomey (H. J. Richardson).
5. Champion (E. L. Shimley to decide).
6. G.E. - Raab/Pozefsky (J. G. Bryant)
7. Aerovox (J. G. Bryant to decide)
