COMPANY
STREET
CITY

Gentlemen:

Asbestos has been designated a carcinogen by the Occupational Safety & Health Administration (OSHA) and that agency has issued a standard governing occupational exposure to asbestos, found at CFR Section 1910.1001. Occasionally, work clothing from this plant which is sent to you for laundering has been worn by personnel engaged in asbestos work and may contain asbestos fibers. Any such clothing will be delivered to your driver in appropriately sealed containers labeled in accordance with the OSHA regulation.

The clothing and bags should be handled by your employees in a manner to prevent release of airborne asbestos. Permissible exposure limits are stated in the OSHA regulation.

Should you have any questions in this regard, please contact us.

Very truly yours,

DUP 0501760
