Dear Sirs:

Re: TOXICITY of AROCLORS / TAMBOUR.

Below please find contents of a letter we received from TAMBOUR PARTS:-

"Re: AOCLOR 1254

It hs recently come to our attention that Chlorinated Diphayls have chronic toxic propterties. Referenoe is mde to TS/B/2189 I.C.I. Technical Service Note, to suppct this contention.

We has been using Aroclor 1254 regularly for quite some me and are now very perturbed by the above mentiqed information.

We woid appreciate, as soon as possible, to hear from you a to whether Aroclor 1254 has these toxic properties, particularly as compared to Chlorinated Paraffins.

I assume that I.C.I. Technical Service Note, which we have never seen, refers to the irritation which can be caused by Aroclor. Do they really speak about toxicity?

I shall be glad to have your early comments.

Very truly yours,
HIRSHBERG BROTHERS & Co.
