Attached are the results obtained from personnel monitoring with the Sipin pumps for the week of 9 September 1974.

A total of 54 samples were analyzed. Three of this total were above the 50 ppm level. All of the high readings were sampled while the operators were breaking the vacuum on the #3 stripper.

The operators involved and their readings were: Mr. Boren - 82 ppm, Mr. Hawkins - 66 ppm, and Mr. Boatright - 56 ppm.
