Dr. Robert A. Kehoe,
University of Cincinnati,
Cincinnati, Ohio.

My Dear Doctor Kehoe:

I heard in a roundabout way that you were on the plant that Saturday but could get no confirmation until the following Monday from Mr. Stecher. I understood that you were in very much of a rush so did not think it strange that I did not see you.

I wish you had given me some idea in your letter as to your opinion of the conditions present in the Lead Ethyl area as you found them this time. Personally I cannot see where they could be improved upon. I am sure the men are showing the results of the change. Nearly every man has had a reduction in his stipple count and it has had a marked action on their mental attitude toward the operation. We have't a man on our list at present that is causing us any concern.

When should we expect a report on the last samples sent for analysis?

Very truly yours,

A handwritten signature in dark ink, appearing to be "L. E. Smith", written in a cursive style.
