Hello Tricia,

My name is Shoshana -- I'm a reporter for *Scienceline* currently working on a story about water filtration -- specifically, why it's so difficult to remove pharmaceuticals from water.

Please let me know if you could possibly schedule a phone call this week or next, or if you'd prefer to keep the questions email-only. If there are any other colleagues that you believe could speak to this issue, feel free to forward this email their way.

Looking forward to hearing from you.

All the best,

SW
