To: Vinylidene Chloride Program Panel

Subject: "Interpretive Review of the Animal Toxicologic,
Pharmacokinetic/Metabolism, Biomolecular and
In-Vitro Mutagenicity Studies on Vinylidene
Chloride and the Significance of the Findings
for Man," by Jessie M. Norris

Dear Panel Member:

Yesterday, Jessie gave me permission to distribute the subject document to all Panel members under the following condition: the enclosed copy is intended for the use of member companies on the VDC Panel. It is to be used only within their respective corporate structures. The document, or any part of it, is not to be published in any form. At a later date, Jessie plans to publish it as an integral part of a risk assessment.

The original treatise under the subject title was completed on and dated November 13, 1980. The enclosed revision is an update of the original.

Kindest personal regards to each of you.

Sincerely,

Joseph T. Seawell
Administrator
Vinylidene Chloride Program
