Subject: Spruance C8 Assessment

With the legal suit, you may want to talk with Legal and not create any documentation that is not necessary....Bob

Subject: Spruance C8 Assessment

Per your request, in support of your work with Circleville, I am providing below a memo documenting the 1991 Spruance wastewater assessments for C8. This information is additionally contained in Technical Report STT-91-1 (1/16/92) which describes the Spruance Teflon* fiber manufacturing process and C8 sampling data. I am sending that report to you via Company mail. Please note that within the context of Spruance EI determinations, a recent submittal addressing the 1991 C8 data was made to EPA Region 3 thru Bob Dunn. Tim Bingman is familiar with the background. Bob Dunn also mentioned the current legal suite which has established a hold on any document destruction concerning the C8 subject.

Please contact me if you need any clarifications of the info I am providing.
