Q Does it indicate whether or not he had pain?

A At the time Dr. Heyman examined him, he has a note here and he says he has no abdominal pain.

Q That is what a mesothelioma would be in the abdomen, wouldn't it?

A That is correct.

Q That is back in December of 1980.

Now, you had mentioned something to the jury and I wrote it down, you were treating him and you said February 1981, and it was a lot of fluid buildup back then, wasn't there?

A The patient had just been tapped of all of the fluid three days or four days before this letter was dictated by Dr. Heyman.

Q Would you read Dr. Heyman's February 18th, 1981, the first paragraph for the jury?

A He has a feeling of tightness, but no pain. He has noted a little knot in the umbilical area.

He has noted no shortness of breath or pedal
