

August 22, 1951

Mr. Manfred Bowditch
Director Health and Safety
Lead Industrial Association
420 Lexington Avenue
New York 17, New York

My dear Mr. Bowditch:-

Enclosed is information I promised in letter of August 17, 1951. I reviewed the records of the cases of lead poisoning treated at the Children's and Cincinnati General Hospitals as compiled by Dr. Smith. I am sending pertinent facts on those patients who died this year.

At present we have no home checkup. All of these homes are in the basin of the city. Houses have received over period of many years many coats of paint.

I hope this information is helpful.

Sincerely yours,

Robert H. Kotte
