Re: Your file "ECJ"
Inquiry M-97-1924

Dear Mr. Jones:

It is our understanding that your company anticipates the testing of various materials on austenitic stainless steel.

During our conversation with you last week you requested our supplying your Engineering Test Center with two (2) of our Caltemp blocks 2" x 6" x 36". This information, together with proper destination identification was passed on to our factory.

We have received advise from our factory that shipment of the above has been made via Air. This was done inasmuch as your request was that these test blocks would be received by Dec. 17, 1962.

We trust the above meets with your approval and that this shipment arrives by the required date.

If we can assist further we would appreciate hearing from you. May we take this opportunity to wish you and your organization a very Happy Holiday Season.

Yours very truly,

Pahoe Industrial Insulations
Fibreboard Paper Products Corp.
