Bulletin O/PL-306 Revision
Your memo, March 26

Cumming Paton

The only changes Dr. Kelly and I would suggest under "Toxicity and Safe Handling" pgs. 50&51 are minor and are as follows:

1. Lines 3 & 4, pg. 50, 4th paragraph in "Inhalation" section, change "The threshold limits (maximum allowable concentration --- etc." to "The threshold limit values (maximum allowable concentration, etc)."

2. Line 1, 1st paragraph, pg. 51, change "continuous or repeated skin contact" to "Prolonged or repeated skin contact, etc."

These are written in in the copy you sent us and which were returning herewith.

Your other proposed deletions are, we believe, very much in order.

Elmer P. Wheeler
